
PRODUCT INFORMATION

Microbe Protect 2420

oil-based silk matt varnish

FIELD OF APPLICATION

The field of application of the oil-based silk matt varnish ranges from pharmaceutical packaging, magazines, playing cards and other printed products that require active surface protection. Finishfit Microbe Protect 2420 contains an additive based on a special nanosilver formulation with specially activated active ingredient. The antimicrobial and antiviral efficacy of the active ingredient has been demonstrated.¹⁾ Elementary silver-nanoparticles (Ag^0) that are firmly anchored in the varnish film release positively charged silver ions (Ag^+), which significantly reduce the number of bacteria and viruses on the surface of the varnish.

The functionality of the active ingredient in the varnish was proven on print samples according to ISO 22196 against the bacterial species

- Escherichia-coli (E. coli)
- Staphylococcus aureus (S. aureus)

and showed a reduction of up to 99.99%. The effectiveness depends on the concentration of the active ingredient.

WITHOUT activated nanosilver active ingredient

WITH activated nanosilver active ingredient

- The antimicrobial and antiviral efficacy of the active ingredient has been demonstrated¹⁾
- The active ingredient is also used in medical masks for protection against viruses²⁾
- In addition, the active ingredients used are subject to external checks on corona viruses at the renowned University of Groningen
- The active ingredient is permanently (24/7) and long lasting active
- Silver-nanoparticles are not released from the dried varnish film nor can they be rubbed off³⁾

PROPERTIES

- Permanent (24/7) and long lasting effectiveness
- Unproblematic processing with and without fountain solution
- Can also be used wet in wet
- Excellent rub resistance
- Fast drying
- Can be used on paper and cardboard

APPLICATION

- **Always read label and product information before use**
- With regard to technical and organisational protective measures, personal protective equipment if necessary, please read safety data sheet
- The properties depend on the substrate and the application quantity
- Stir well before use
- Attention: Microbe Protect 2420 has a typical inherent colouring for oil-based varnishes which does not affect the effectiveness of the varnish and has only a marginal effect on the printed image, hardly noticeable to the naked eye

COUNTRY LISTINGS

The product is currently available in the member states of the European Union (EU).

ADDITIVES

- For cleaning rubber rollers we recommend Cleanfit Roller Paste 2299

STORAGE

- Protect from frost, heat and direct sun light
- Storage only in original packaging at 10 – 30 °C (50 – 86 °F)
- At higher temperatures, the active ingredient can change optically into greyish, but this has no influence on its effectiveness
- Unopened and correctly stored, the Microbe Protect 2420 has a shelf life of 12 months from delivery date

DISPOSAL

Microbe Protect 2420 must be disposed of professionally with waste key number AVV 08 03 13. If you have any questions, please contact your local, regional or national specialist disposal company on site.

STANDARD PACKAGING

- 1 kg tin
- 2.5 kg tin
- 200 kg drum
